

SOLAR SYSTEM PROMOTION TERMS AND CONDITIONS

5kW Solar Systems from \$4,990 fully installed.

19 x 265w or 270w solar panels available in silver framed models only.

Not valid or available with or in conjunction with any other offered promotion. Available while stocks last. Town & Country Solar reserve the right to stop, withdraw this offer at any stage. Promotion available for new customers only.

Above price is subject to eligibility, creation and assigning REC's/Solar Credits to Town & Country Solar as a one off 14-year period in exchange for a point of discount sale. The point of discount sale has already been factored into the above pricing. The point of discount sale is based on a STC price of \$30. System prices will be adjusted and additional costs will apply to systems if the STC price falls below the \$30 value. The STC price is based on the Greenbank Environmental STC price (greenbank.com.au/stc trading). All Components and Equipment remain the property of Town & Country Solar until full payment has been received. Full payment due on or before installation date. Refunds of deposits are at the discretion of Town & Country Solar. Customers are required to obtain all relevant approvals, consents and permits from local council/planning authority and state governments prior to installation. Note: End price includes GST, SA Power Networks Import/Export meter is not included in above pricing. Further information on solar feed in tariffs and eligibility can be found at www.sa.gov.au/energy/solarfeedin. Town & Country Solar is not responsible for customers eligibility to the government feed in tariff and or any rates & charges customers may be charged or paid by their nominated electricity provider. Total price includes a non-refundable site inspection and design fee of \$500 System outputs, configuration and final system output efficiency estimate to be confirmed once site inspection and design has been completed. Variations in quotation may be required as above pricing is based on a standard installation only. Standard installations are defined as single storey, iron roof installations with a maximum of two array sections. All variations from "standard installations" will be charged to the customer and confirmed during site inspection. Variations may include but not limited to tile roofs, multiple storey, more than two array sections, electrical works, travel costs. Above promotion does not include installation of meter isolators, meter isolator provisions may be installed as a variation of works.

Mounting structure (roof area) is visually assessed for suitability by Town & Country Solar prior to installation however customers must take necessary actions to ensure continued structural integrity of the structure. *System performance estimations above are for quick guides only. Note your rights and obligations, form 1 notice under section 28(1)(f) of building work contractors act 1995. Relevant information can be found at www.legislation.sa.gov.au CONFIRMATION OF SYSTEM SIZE - COSTINGS CAN ONLY BE CONFIRMED AT THE TIME OF INSPECTION AND SYSTEM DESIGN.
